

PROBLEM:

Sinusoidal Signal $x(t) = A \cos(\omega_0 t + \phi)$

The above graph is a plot of a sinusoidal signal $x(t) = A \cos(\omega_0 t + \phi)$.

- Determine numerical values for A , ω_0 and ϕ with $-\pi < \phi \leq \pi$.
- By a suitable choice of delay t_d , we can shift $x(t)$ to obtain the new signal

$$y(t) = x(t - t_d) = A \cos(\omega_0 t) \quad (1)$$

There are an infinite number of values of t_d that satisfy Equation (1). Give an equation for these values. *If you cannot write the general expression, give at least **two** different values of t_d .*
