PROBLEM: Suppose that MATLAB is used to plot a sinusoidal signal. The following MATLAB code generates the signal

T = 20/1000;

and makes the plot. Draw a sketch of the plot that will be done by MATLAB.

Fsamp = 5000;

tt = 0 : (1/Fsamp) : T; Fo = 125; xx = 6*cos(2*pi*Fo*tt - pi/4);
