PROBLEM:
A linear time-invariant system has system function

$$
H(z)=\left(1+z^{-2}\right)\left(1-4 z^{-2}\right)=1-2 z^{-2}-4 z^{-4}
$$

The input to this system is

$$
x[n]=20-20 \delta[n]+20 \cos (0.5 \pi n+\pi / 4)
$$

Determine the output of the system $y[n]$ corresponding to the above input $x[n]$. Give an equation for $y[n]$ that is valid for all $n$.
